Tangerang, Gading serpong

Fresh graduate in Informatics Engineering from Pradita University with hands-on experience building mobile applications using React Native and TypeScript. As a Mobile Developer at PT Sigma Cipta Caraka (Telkomsigma), I built and maintained a React Native HR/self-service app used by 2,300+ employees, integrating REST APIs, managing state with Redux Toolkit, and collaborating closely with backend engineers and UI/UX designers throughout the development lifecycle. Present as a *Fullstack Developer* at Triverie, building internal business systems end-to-end. I enjoy solving problems across the full stack, from mobile UI to backend integration, and I care about shipping features that hold up in production.

WORK EXPERIENCE

PT Mimpi Tiga Pengelana - Tangerang

Jun 2026 – Aug 2026

Fullstack Developer

- Designed and developed an internal operations dashboard to digitize agency project/client management, replacing manual spreadsheet and WhatsApp-based tracking of deadlines, revisions, and task assignments across external clients
- Built a configurable payment system supporting multiple staff compensation models (per-project and per-client rates, per-output and flat-monthly structures) to automate payroll calculation
- Implemented a task-request approval workflow connecting client-side coordinators and internal staff, with status tracking and automatic project generation on approval
- Architecting the management platform with Next.js, Redux, Supabase architecture.

PT Sigma Cipta Caraka - Tangerang

Jun 2025 - Dec 2025

Mobile Developer

- Maintained a live React Native app for 2,300+ daily users, tracking and resolving post-launch stability issues.
- Integrated REST APIs via Axios for real-time client-server data exchange across multiple feature modules.
- Managed application state with Redux Toolkit, keeping data flow consistent across a multi-screen, multi-role app used by 2,300+ employees.
- Achieved a 100% functional test pass rate on the app and ran a 25-respondent UAT evaluation of the app, achieving an 83.2% user satisfaction score.
- Used Git/GitHub for version control and code review across sprints within a structured team workflow.

PT Humanis Siber Indonesia - Tangerang

Mar 2025 - May 2025

Frontend Developer

- Designed and built a responsive company profile website in Vue.js and Tailwind CSS with clear CTAs.
- Tested and verified consistent layout and interaction across 3 device breakpoints: mobile, tablet, and desktop.
- Collaborated with UI/UX designers in a cross-functional team to refine the user experience.
- Contributed to the startup's growth by delivering a high-quality web solution, helping attract an estimated 31% more visitors.
- Delivered full responsiveness and WCAG-aligned accessibility across mobile, tablet, and desktop breakpoints.

Cangopi - Tangerang

Jun 2024 - Dec 2024

Frontend Developer

- Built the end-to-end POS frontend (HTML, CSS, JavaScript) covering cashier and warehouse workflows on a Laravel backend.
- Developed the cashier transaction module handling order processing, payment, and receipt generation for daily operations.
- Built menu management and stock reporting modules with real-time inventory tracking and warehouse movement summaries.
- Partnered with the backend team to align API contracts, catching data-flow mismatches before reaching production.
- Applied reusable UI patterns in vanilla JavaScript to keep the codebase maintainable as POS features grew.

CV. Anakpipa Sinergi Pratama - Tangerang

Jun 2023 - Aug 2023

UI/UX

- Conducted user research to identify pain points in an existing B2B sales platform workflow.
- Designed wireframes and high-fidelity interactive prototypes in Figma based on research findings.
- Iterated the design across 2 client feedback rounds, balancing visual polish with functional requirements.
- Validated prototypes against real B2B user workflows to ensure practical usability before handoff.

EDUCATION

Pradita University - Tangerang

Sep 2022 - Aug 2026

Bachelor of Informatics, 3.52/4.00

During my studies at Pradita University, I actively developed academic projects across Web Development, Mobile Development, IoT, and Machine Learning I gained hands-on experience in software development, system integration, requirements analysis, functional

testing, debugging, and problem solving, while continuously strengthening my technical skills in React Native, Flutter, Laravel, JavaScript, Python, IoT, and Machine Learning.

PROJECTS

Hypermart warehouse management

Apr 2025 – June 2025

Fullstack Developer

- Built a full-stack Warehouse Management System using Node.js/Express, Prisma ORM (MySQL/MariaDB), and a React + Vite frontend, covering both backend and frontend end-to-end.
- Designed the relational database schema and REST API architecture (MVC pattern) covering users, warehouses, suppliers, inventory, and purchase orders, with Zod schema validation.
- Implemented JWT authentication and a dynamic, configurable RBAC system controlling menu and sub-menu access per role.
- Built the purchase order and receiving workflow, including a multi-status order lifecycle (Open → In Transit → Receiving → Verified/Cancelled) with approval tracking.
- Wrote automated integration tests using Vitest and Supertest to validate API behavior.

Pradita Canteen Food Order System

Jan 2025 – Mar 2025

Mobile Developer

- Built a full-featured Flutter/Firebase food ordering app end-to-end, covering both frontend and backend systems.
- Implemented role-based authentication across 3 user types (customer, seller, admin) with a complete order flow.
- Integrated cart management and payment gateway functionality to support real-time, end-to-end order processing.
- Added real-time push notifications for order status, plus seller and admin panels for platform management.

Pradita UKM Finance Management Website

Aug 2024 – Nov 2024

Fullstack Developer

- Built a UKM financial management website end-to-end using Laravel, PHP, HTML, CSS, and Bootstrap.
- Developed a dashboard for real-time financial overview and tracking.
- Implemented financial record-keeping and reporting features for transaction and income/expense management.
- Built report export functionality to support financial documentation and record retrieval.

Summarecon Serpong Internal Website

Aug 2023 – Dec 2023

UI/UX

- Conducted user interviews with Summarecon stakeholders to identify workflow pain points around training enrollment and approval before entering the design phase.
- Designed a multi-step approval flow covering training event creation, employee training requests, and training plan setup.
- Built role-based dashboard views for admins and participants, including status tracking and filtering for ongoing, pending, and completed training.
- Designed wireframes and high-fidelity interactive prototypes in Figma, refined across 3 client feedback rounds to balance usability with stakeholder requirements.

MyTukang – Service Marketplace Mobile App

Jan 2023 – Mar 2023

UI/UX

- Designed the UI/UX for a service marketplace mobile app connecting users with service providers ("tukang"), covering the full design process independently.
- Conducted user research to identify pain points in the service-booking experience.
- Built wireframes and high-fidelity interactive prototypes in Figma based on research findings.
- Iterated the design through user testing and feedback to refine usability before handoff.

Summarecon Serpong Lifestyle Apps

Sep 2022 – Dec 2022

UI/UX

- Designed the end-to-end UI/UX for a lifestyle app serving Summarecon residents, covering the full scope of features independently.
- Designed booking flows for smart parking, CCTV access, and shuttle bus services.
- Designed a mobile credit (pulsia) top-up feature and a UMKM marketplace for local merchants to sell products.
- Designed an entertainment/leisure booking section for local venues and activities

SKILLS

- **Mobile Development:** React Native, TypeScript, JavaScript, Flutter.
- **State Management:** Redux
- **API & Backend Integration:** REST API (Axios/Fetch), Firebase (Auth, Firestore, Realtime DB), MySQL, Supabase
- **Tools & Version Control:** Git, GitHub, Postman
- **Web Frontend:** Laravel (Blade), HTML, CSS, JavaScript, Tailwind CSS, PHP, React
- **Collaboration:** Figma, Agile/Scrum, Cross-functional teams
- **QA & Testing:** Postman (API Testing), Jest (Unit Testing), Manual/Exploratory Testing, Jira & Trello (Bug Tracking), Git/GitHub
